Description

The Executive Master's in Public Health Emergency Management program is specifically designed to equip health professionals and students with the advanced knowledge and practical skills needed to lead during public health crises. From managing emergencies to strengthening health systems and promoting community resilience, this program prepares you to take on leadership roles in complex crisis scenarios.

Key Learning Outcomes

Upon completion of the program, participants will be able to:

- Lead health services and teams during emergencies with confidence and expertise.
- Implement evidence-based strategies in managing public health crises.
- Conduct public health research, contributing to policy development.

This program provides a comprehensive education in public health emergency management, combining theory, practice, and research.

Program Structure

The program is divided into **three subprograms**, each designed to build on essential skills for managing public health emergencies. Participants will complete the coursework over **nine months**, followed by a 3-month supervised capstone project.

Subprogram 1:
Basics of Public Health Emergency Management

Duration: 3 Months (First Quarter)

Modules:
- Module 1: Introduction to Public Health
- Module 2: Management and Leadership
- Module 3: Principles of Public Health Emergency Management
- Module 4: Public Health Interventions in Emergencies
- Module 5: Human Conflicts and Humanitarian Work
- Module 6: Research Methodology

Subprogram 2:
Public Health Risk Management

Duration: 3 Months (Second Quarter)

Modules:
- Module 1: Public Health Tools and Techniques in Challenging Conditions
- Module 2: Public Health Risk Management
- Module 3: Risk Communication
- Module 4: Public Health Management of Mass Gatherings
- Module 5: Community-Based Risk Management
- Module 6: Biostatistics

Subprogram 3:
Managing Primary Healthcare Services in Emergencies

Duration: 3 Months (Third Quarter)

Modules:
- Module 1: Communicable and Non-Communicable Diseases in Emergencies
- Module 2: Women and Child Health in Humanitarian Settings
- Module 3: Nutrition in Emergencies
- Module 4: Environmental Health in Emergencies
- Module 5: Scientific Writing
- Module 6: Proposal Submission

Capstone Project

Duration: 3 Months (Fourth Quarter)

Participants will complete a **3-month** supervised research project on a real-world public health emergency, supervised by recognized advisors. They will apply their skills to develop solutions for complex public health challenges.

Who Should Apply?

Health professionals aiming for leadership roles.

Individuals advancing careers in health service provision, crisis management or research.

Aspiring leaders in national or regional health systems.
